Join us
to acquire and practice industry relevant skills...

OBJECTIVES

As part of our passion to support engineering students in their career path, we offer a variety of programs that encourage you to apply your skills in fun and rewarding ways.

Our objective is to enhance and sharpen your skills, knowledge, abilities and values essential for your professional life foundation:

- 1. Knowledge of work :**
Duties of personnel, processes, materials, machines, and tools.
- 2. Knowledge of responsibilities :**
Techniques and ability to perform work in accordance with the company rules, policies, and plans.
- 3. Skills in leading :**
Skills for harmonious human relations in the supply chain management system.
- 4. Skills in improving methods :**
Making a detailed study and analysis of an operation to make it lean.
- 5. Skills in instructing :**
Skills required for training experienced veterans.

PROGRAMS

- Short duration basic foundation programs are open to students currently studying a technical degree. These programs provide students a practical experience and exposure to the needs of their professional career.
 - Personalized skill development programs are available both for students and in-service professionals.
- 1. Skills-Based Training :**
Enhance your skills; get exposed to techniques and ability to effectively perform at work.
 - 2. Professional Development :**
Attend technical talks by senior persons from industry, learn how to enhance your resume; tackle technical interviews; and improve your presentation skills.
 - 3. Fun :**
Building relationship with your peers; social activities; community building and networking.
 - 4. Exposure :**
A unique program to practice your skills and knowledge in a professional environment on mock and live projects.
